

Delivering Wireless Test Solutions to Major Carriers in China

Seoul, Korea. September 4, 2009. GenComm today announced it has delivered wireless field test solutions to major wireless service providers in China. GenComm's solutions help ensure high-quality network installation and maintenance for reliable service performance.

This achievement is based on its partnership with JDSU whom sales and supports GenComm's RF products making a comprehensive solution to wireless service providers. JDSU has established a leading portfolio of test solutions for wireless backhaul and cell sites supporting mobile networks.

"JDSU's partnership with GenComm has allowed us to effectively provide global wireless service providers a comprehensive solution based on products and services for 3G wireless technologies including TD-SCDMA deployed in China" said Eduardo Inzunza, vice president of sales and marketing of GenComm. "In addition to the evolution of wireless technologies, the intrinsic characteristics of field test equipment of flexibility, performance, affordability, and ease of use, are allowing us to position our products as the optimal solution for wireless service providers around the world".

JDSU's wireless field test solutions for installation and maintenance include the following:

Base station analyzer
JD7105A

RF Analyzer
JD7106A

Cable and antenna analyzers
JD720 Series

Power sensors
JD730 Series
